

A quality grain pellet providing vital

nutrients to promote development

Age range: DAY 3 - WEANING

Sizes: 30KG BAGS, BULKA BAGS, BULK

ABOUT CALF & LAMB PELLETS

A small, highly digestible pellet formulated to provide protein, vital nutrients and energy to calves and lambs from 3 days old through to weanlings. The quality grain ingredients provide volatile fatty acids to stimulate rumen development and our concentrated formula with no nutritionally poor fillers makes Calf & Lamb Pellets a cost-effective feeding solution.

PRODUCT FEATURES

4mm pellet is manageable for young lambs and calves. enhancing digestion while minimizing wastage

Quality grain ingredients provide Volatile Fatty Acids (VFA's) to promote rumen development in young calves and lambs

Contains Agolin Ruminant, an oil-based feed additive for improved rumen function, performance and methane reduction

High protein (19%) from quality grain sources with no nutritionally poor fillers

Fortified with our specially formulated ruminant vitamin and mineral premix

All natural ingredients, GMO & antibiotic free with minimal processing

Made using fresh, premium produce from local WA farmers

CALF & LAMB PELLETS

TYPICAL INGREDIENTS

May contain one or more of the following due to seasonal variations:

Barley, Lupins, Salt, Oats, Dicalcium Phosphorus, Mill Mix, Cereal By-Products, Vitamin & Mineral Premix, Agolin Ruminant*

*Agolin Ruminant is a carefully balanced combination of microencapsulated essential oil compounds that optimise feed intake and reduce methane emissions. It is certified by the EU Carbon Trust for methane abatement.

INCLUSIONS

- This feed includes Agolin Ruminant, an oil based feed additive to buffer the rumen and improve feed conversion efficiency.
- In case of feeding to non-target animals, Agolin Ruminant presents no particular risks.
- This product does not contain Urea
- This product does not contain Restricted Animal Material

STORAGE INSTRUCTIONS

Store in dry cool and clean place. When stored under correct conditions best before 12 months from packing date.

FEEDING GUIDE

Calf & Lamb Pellets should be fed as part of a balanced diet.

- These pellets have a very high grain content so must not be fed to hungry stock to avoid acidosis
- Please introduce over a 3-5 day period using hay or another source of fibre as a supplement
- Recommended daily intake of 2-2.5% of body weight
- Ensure clean fresh water is always available

Orphan/poddy lambs and calves:

Calf and Lamb Pellets can be introduced from as young as 3 days old.

- Offer with small amounts of fresh feed twice daily
- Amount fed will depend on the age and milk intake of the animal
- These are not milk replacement pellets and should be fed in conjunction with a milk supplement for young animals

Acidosis risk increases over 6 weeks of age, so please introduce over a 3-5 day period offering roughage. Once properly introduced, ad lib is recommended.

Manufactured and supplied to order in our Western Australian Plant to ensure maximum product freshness

NUTRITIONAL ANALYSIS: GUARANTEED MINIMUMS (AS FED)			
Crude Protein (%)	19.0	Copper (mg/kg)	8.0
Metabolisable Energy (MJ/kg)	11.8	lodine (mg/kg)	0.5
Fibre (%)	18.6	Iron (mg/kg)	40.0
Vitamin A (IU/kg)	5000.0	Manganese (mg/kg)	20.0
Vitamin D3 (IU/kg)	500.0	Molybdenum (mg/kg)	0.20
Vitamin E (mg/kg)	50.0	Selenium (mg/kg)	0.20
Thiamine/B1 (mg/kg)	3.0	Zinc (mg/kg)	40.0
Cobalt (mg/kg)	0.40	Antioxidant (mg/kg)	5.0
Digestibility (%)	81.0	Agolin Ruminant (mg/kg)	50.0

CAUTION

The introduction of high grain pellets to livestock requires a well managed induction phase to minimise the risk of gastrointestinal upsets. Please speak to your animal nutritionist or contact us for more information. The information in this document is a guide intended for our customers and advice may vary depending on individual circumstances.
