

Age range: DAY 3 TO 6-8 WEEKS OLD

Sizes: 30KG BAGS, BULKA BAGS, BULK

ABOUT RANGELAND CALF PELLETS

Rangelands Calf Pellets are a high protein and energy feed formulated to support the demands of early growth and development of calves in northern pastoral systems. Suitable for introduction from 3 days old, the quality grain ingredients provide Volatile Fatty Acids to promote rumen development and improved feed conversion efficiency. Made with Agolin Rumimant to help buffer the gut, enhance rumen function and efficiency while reducing methane emissions.

PRODUCT FEATURES

4mm pellet is highly palatable and designed for easy feeding in tubs, bunks or bins. Minimises wastage and improves nutrient uniformity.

Made using quality grain ingredients with no nutritionally poor fillers for improved feed conversion efficiency

Contains Agolin Ruminant, an oilbased feed additive for improved rumen function, performance and methane reduction

High protein and energy formula to support the transition from grazing and browsing into pen feeding

Fortified with our rangeland vitamin and mineral premix to support the requirements of northern cattle

All natural ingredients, GMO & antibiotic free with minimal processing

Made using fresh, premium produce from local WA farmers

RANGELAND CALF PELLETS

TYPICAL INGREDIENTS

May contain one or more of the following due to seasonal variations:

Wheat, Barley, Malt Combings, Lupins, Vitamin & Mineral Premix, Agolin Ruminant*

*Agolin Ruminant is a carefully balanced combination of microencapsulated essential oil compounds that optimise feed intake and reduce methane emissions. It is certified by the EU Carbon Trust for methane abatement.

INCLUSIONS

- This feed includes Agolin Ruminant, an oil based feed additive to buffer the rumen and improve feed conversion efficiency
- In case of feeding to non-target animals, Agolin Ruminant presents no particular risks
- This product does not contain Urea
- This product does not contain Restricted
 Animal Material and can be fed to ruminants

STORAGE INSTRUCTIONS

Store in dry cool and clean place. When stored under correct conditions best before 12 months from packing date.

FEEDING GUIDE

- · Feed as part of a balanced diet
- These pellets have a high grain content so must not be fed to hungry stock
- Rangeland Calf Pellets should be introduced over a 3-5 day period using hay or another form of fibre as a supplement
- These are not milk replacement pellets and should be fed in conjunction with a milk supplement for young animals
- Avoid any interruptions to the daily feeding pattern. If interruptions occur, re-introduce slowly.
- Ensure fresh, clean water is always available

Acidosis risk increases over 6 weeks of age, so please introduce over a 3-5 day period offering roughage. Once properly introduced, ad lib is recommended.

RECOMMENDED INTAKE

The recommended intake of this product should be **up to 3% of live weight daily.** Adjust rate according to growth stage and pasture availability.

Manufactured and supplied to order in our Western Australian Plant to ensure maximum product freshness

NUTRITIONAL ANALYSIS: GUARANTEED MINIMUMS (AS FED)			
Crude Protein (%)	20.9	Potassium (g/kg)	3.3
Metabolisable Energy (MJ/kg)	13.3	Chloride (g/kg)	5.1
Crude Fat (%)	3.2	Sulphur (g/kg)	4.6
Lysine (%)	0.5	Copper (mg/kg)	14.0
Iron (mg/kg)	73	Zinc (mg/kg)	72.0
Calcium (%)	0.62	Manganese (mg/kg)	40.0
Phosphorus (%)	0.49	Selenium (mg/kg)	0.38
Sodium (g/kg)	2.3	Vitamin A (IU/kg)	5400
Magnesium (g/kg)	2.9	Vitamin E (mg/kg)	57.0
lodine (mg/kg)	0.39	Cobalt (mg/kg)	0.2

CAUTION

The introduction of high grain pellets to livestock requires a well managed induction phase to minimise the risk of gastrointestinal upsets. Please speak to your animal nutritionist or contact us for more information. The information in this document is a guide intended for our customers and advice may vary depending on individual circumstances.
